

SECURITY MANAGEMENT SYSTEMS

Security Management System (SMS) is an Add-On Modulated, end-user friendly, guard tour system. SMS monitors all guard activities and tracks user-definable incidents. SMS integrates a database and a portable reader into a complete, easy-to-use tracking and evaluating system for your security organization. What's unique about SMS is that you can create and design your own personal software program according to your company's needs. Add-On Modules according to what types of hardware you want to use. Add-On Modules according to what types of Reports your company will need, and your client's will require.

Security Management Systems Software Program comes with the TouchProbe Download Add-On Module Software and the Activity Reports Group. All other Download Add-On Module Software and Reports are sold separately.

Features:

- Designed to work with barcodes and/or iButtons
- Monitors all guard activities
- Provides accurate timekeeping
- Identifies and tracks problem areas
- Prints accurate, concise, and readable reports
- Maintains a complete history file
- Replaces inaccurate key-round or GCS type systems
- Designed to serve the special needs of a **Patrol Service**
- Prints **Reports** by **Chronological** order, by **Client**, by **Site/Routes**, by **Location**, by **Incident** or by **Person** to help you identify problem areas or routes
- Prints **Exception Reports & Missed Hit Reports** to track how effective the rounds are done.
- Prints **Time Management Reports** to show time spent during a Tour, including time between hits.
- E-mail your clients their reports
- Keyboard input via the portable reader so your officers can "Write Up" problems (DuraTrax,LaserLite&LaserLite-Pro)

Benefits:

- Eliminates the tedious work of hand data entry
- Provides guard activity reports, incident reports, and history reports
- Gives you flexibility to adjust guard rounds to address problems areas
- Has a variety of 24 available reports to help you analyze your security force and maximize their productivity and effectiveness
